A great many of the corrections noted in the following pages are due to the breaking off of diacritical marks in types for capital letters. For this reason, in these lists of errata I have abandoned the use of capital letters so far as was possible.

The more important Addenda are given separately in Supplement I.

In order to allow these errata to be cut up and inserted in their proper places in the several volumes, they are printed only on one side of the paper.

VOLUME II.

Page 2, line 19.—I withdraw the statement that the Munḍā languages show traces of connexion with the speeches of the aborigines of Australia. The researches of Pater Schmidt show that such traces do not exist.

Page 6.—Add the following to the list of authorities:—

U NISSOR SINGH.—*Khasi-English Dictionary* (1906).

English-Khasi Dictionary (1920). Shillong, Assam Secretariat Press.

Pages 4ff.—Throughout substitute 'Khāsi' for 'Khasi'. The former is the correct spelling.

Page 7, line 20.—I am in error in stating that Khasi (or, as now more usually spelt, Khāsi), like other languages of the Mōn-Khmēr family, possesses tones. It has, it is true what used to be called the 'Abrupt Tone' or the 'Entering Tone', but later researches show that this is not a tone at all. A tone is now defined as 'a relatively fixed acoustic pitch or change of pitch, inherent in a word, and necessary for its significance'. Such tones are found in Tibeto-Burman, Tai, and Chinese, but are not heard in any of the Mōn-Khmēr languages. The so-called 'Abrupt Tone' has nothing to do with pitch. It is simply an abrupt, or staccato, termination of a syllable, and is technically described as a glottal check. Such checked syllables are common in Khāsi and, I believe, in all Mōn-Khmēr languages, but they should not be referred to as being toned.

Page 47, No. 108, Khasi (Wār) column.—Read 'tu i'pa'.

Page 59, line 6 of text.—Omit from 'The word "Siam" is most probably' down to the end of the paragraph, and substitute the following:—

The word 'Shān', with a final *n*, is a Burmese corruption of 'Shām'. This latter form is universally employed by the people of the Tai race in Assam when speaking of themselves or their language, and is the only form known to their Assamese neighbours. In Burmese, a final *m* is regularly replaced in pronunciation by *n*, although retained in writing; and the original form, with *m*, is vouched for by the name 'Siam', which is probably the same word as 'Shām' (see Yule-Burnell, *Hobson-Jobson*, s. vv. Shan and Siam). What the word 'Shām' originally meant is yet unknown, but there appears to be reason to believe that the name 'Āhom' contains it, being really *Ā-shām*, the sibilant being converted into the aspirate by the change common in Assamese. Although, as above stated, 'Shām' is the correct form, 'Shān' will be used for the language in this part of the Survey, as having obtained general currency.

Page 60, line 4.—The words 'Centuries later' do not refer to the date 1204 A. D., mentioned at the top of the page, but to the Tai migration into Nām Mau in the sixth century. The Āhom invasion of Assam began in 1228.

Page 61, line 6.—Colonel Woodthorpe and Major Macgregor in 1884-85, and Mr. Errol Gray in 1892-93 entered the independent Khāmṭi country, or Bor Khāmṭi, from Assam, and, in 1895, Prince Henry of Orleans passed through it in the course of his journey from Tonkin to Calcutta. In Footnote² on this page it would be more correct to write "Āshām" (آشام) than "Asam".

Page 64, line 5.—It is not likely that the Āhoms ever were Buddhists. They probably were pagan Shāns, and invaded Assam before Buddhism spread to that race. Perhaps they had some form of Hindū-Brahmanical culture, which seems to have preceded Buddhism in Further India.

Page 65, line 12.—I am indebted to the late Sir Charles Lyall, for the following more accurate account of the Aitons :—

‘Their settlements are in the Barpathar [in the Sibsagar District], about twelve miles into the Nambar forest, where they have a village (which I have visited) on the bank of the Dhansiri, and cultivate a large grassy plain in the midst of the forest. They are differentiated from all the other modern Shāns in Assam by the fact that they got there from the Kubo Valley, that is, from Burma, within quite recent years, and have kept up constant connexion and communication with their original home. The main road between Burma and Assam passes through Manipur, the Naga Hills, and the Nambar forest, and their villages are on it. I have myself met Shāns in the Barpathar village who were recent arrivals from Burma and who had come that way, and have seen in their priests’ houses (*Bapu-chāng* in Assamese) printed and quite modern books in both Burmese and Shān (*Mān-kathā* and *Shām-kathā*).

All the other modern Shāns who still speak Shān in Assam come from across the Patkai or *via* the Tengapani. These Aitons come from the Chindwin, much lower down. I should doubt their fetching their priests ‘from the Khāmti villages in Lakhimpur’ for this reason. Sir D. Brandis told me that in 1879 he visited the Aitoniās in Barpathar, and found them well acquainted with Burma and able to talk to him in Burmese, which he knew very well.’

Page 65, line 12 from bottom.—As already stated, the Āhoms were probably pagans, not Buddhists.

Page 69 in Table.—After ‘Bodo ko-rai’, add ‘(Possibly borrowed from Aryan)’.

Page 76.—Add the following to the list of authorities on Āhom :—

GOLAP CHANDRA BORUA, RAI SAHIB.—*Āhom-Assamese-English Dictionary*. Calcutta, published under the authority of the Assam Administration, 1920.

Page 224, No. 145, Khāmti column.—For ‘ngö’, read ‘ngō’.

Page 226, No. 183, Khāmti column.—For ‘po-ñ’, read ‘rō-ñ’.

VOLUME III—PART I.

Page xiv.—*Opposite* the entry for page 369, *read* 'Chaurāsya'.

Page 2.—*Substitute* the following for the Table on this page :—

Mr. Hutton informs me that the specimens, on which my grammatical sketch on pp. 223ff. is founded, are in the Lazmi dialect, which is very different from the language spoken by the greater part of the tribe.

Page 379.—Sir Charles Lyall, in 'The Mikirs' (London, 1908), pp. 151ff., maintains that Mikir belongs to the Nāgā-Kuki, rather than to the Nāgā-Bodo group, and, on a reconsideration of the whole subject, I agree with him, and have made the necessary correction in the statistical tables of the Survey. The table of the number of speakers of the Nāgā-Bodo group should therefore be as follows:—

Kachchā Nāgā	10,280
Kabui	11,073
Khoirāo	15,000
										TOTAL	<u>36,353</u>

Page 381.—Add at the end of the List of Authorities:—

Page 451.—As explained in the correction of Page 379, *Mikir* should be *added* to the Nāgā-Kuki group, and the following Table should be *substituted* for that on this page:—

Mikir	89,516
Sopvomā or Māo Nāgā, about	10,000
Marām, about	2,500
Miyāngkhāng, about	5,000
Kwoireng or Liyāng, about	5,000
Tāngkhul and its dialects, at least	26,000
Maring, about	1,500
TOTAL	<u>139,516</u>

As in the original, it is to be understood that these figures are only rough approximate estimates.

Page 463.—‘Luhūpā’ is not the name of a tribe, but means the wearer of the *luhup*, or peculiar helmet worn by many tribes of North Manipur, including the northern sections of the Tāngkhuls. These people are often hence called ‘Luhūpās’, a name which is sometimes carelessly extended to the whole tribe. All Tāngkhuls are not Luhūpās, and the name is also applicable to tribes who are not Tāngkhuls. See Mr. T. C. Hodson’s *The Nāga Tribes of Manipur*, p. 33.

The following work should be *added* to the List of Authorities on Tāngkhul:—

PETTIGREW, REV. W.—*Tangkhul Naga Grammar and Dictionary (Ukhrul Dialect), with Illustrative Sentences*. Shillong, 1918.

Pages 480ff.—A revised List of Words in Tāngkhul will be found in the Addenda Majora.

Page 23.—Add to the List of Authorities on Meithei the following :—

HODSON, T. C.—*The Meitheis*. London, 1908. On pp. 155ff. a valuable account of the language and of its relationship to other Tibeto-Burman languages. Appendix II, a specimen of archaic Meithei.

PETTIGREW, REV. W.—*Manipuri (Mītei) Grammar with Illustrative Sentences*. Allahabad, 1912.

Page 27, line 7 from below.—For ‘i-hāk’ read ‘ai-hāk’, and so throughout. In line 2 from below it is said that the forms ending in *hāk* are used in an honorific sense. Mr. Pettigrew (p. 21) says that he has failed to find such a reason for their use.

Page 43.—The Lūi, also called Lōi, languages are now nearly extinct, being superseded by Meithei. Even the few who still speak them are generally unwilling to admit the fact. These languages have been the subject of some inquiry since they were described in the Survey. The speakers of Andro and Sengmai probably came from the East, *i.e.*, from Burma, and this is borne out by the fact that the two languages (they are really dialects of the same language) are closely connected with the Kadu spoken in the adjoining districts of that Province. See my article ‘Kadu and its Relatives’ on pp. 39ff. of Volume II, Part I of the *Bulletin of the School of Oriental Studies* (London, 1921). The correct affiliation of Kadu to other Tibeto-Burman languages is still under discussion, and a definite decision cannot be expected until the results of the Linguistic Survey of Burma have been published. The question of Chairel is still more obscure. It evidently has only the most distant relationship to Andro and Sengmai, and, although undoubtedly a Tibeto-Burman language, I have not yet succeeded in connecting it with any other known to me.

Page 45, Meithei column, No. 8, read ‘ni-pāl’; No. 9, read ‘mā-pāl’; No. 14, for ‘i-hāk’, read ‘ai-hāk’; No. 24, read ‘na-khoi nang, na-hāk’.

Page 47, Meithei column, Nos. 52 and 56, read 'nu-pī'; Nos. 58 and 59, read 'mi'; No. 66, read 'ishing'; No. 69, read 'shal, shan-bī'.

Page 48, *Meithei column*, No. 83, read 'shi-ru'; Nos. 95 and 96, read 'adugā'; No. 99, read 'nat-tē'; Nos. 102, 104, (p. 49) 107, 109, 111, 113, 116, 118, 120, 122, 125, and 127, the suffix 'gi' should be corrected to 'gī'.

Page 50, Nos. 142—145, Meithei column.—For ‘sal’, read ‘shal’.

Page 72, line 2.—‘Kamhow’ is a better spelling than ‘Kanhow’. Mr. Taylor informs me that the Kamhows are a tribe of Suktēs who separated under a chief called Kamhow, and who consolidated themselves as a distinct clan. Their speech is probably the same as Suktē.

Page 108, line 14.—For ‘Hualgnos’, read ‘Hualngos’.

For further particulars, see Shakespear, 'The Lushei Kuki Clans', p. 185.

Page 234, lines 1 and 2.—The correct name of the tribe and of their language is 'Kolhreng', not 'Kolrēn' or 'Koireng'.

Page 256, line 4.—The spelling 'Hmār' is better than 'Hmar' or 'Mhār'. The Lushēis call the people 'Hmār' because they live to their (the Lushēis') north. The Chin word *mār* means 'goat', and the Chins call the Lushēis by this name because they wear goat's hair. The words *hmār* and *mār* have therefore no connexion.

In the same periodical, Vol. XLII (1913), pp. 200ff. P. T. Srinivas Iyengar maintains that the text as given by Burnell is erroneous. The correct reading should be *Drāviḍādi-bhāshā*. If Mr. Iyengar’s contention is accepted, Kumārila cannot be quoted as speaking of an Āndhra and a Drāviḍa speech.

Page 286.—The estimated number of speakers of Tamil includes 950,844 inhabitants of Ceylon. If we confine ourselves to India only, the estimated number of speakers of Tamil should therefore be 15,272,856, and the estimated total for all Dravidian languages should be 53,073,261, instead of 54,024,105.

Page 297.—Add the following at the end of the List of Authorities on Dravidian languages generally :—

Page 23, line 11.—Father Hosten, in his paper in 'Bengal Past and Present' (Vol. IX), mentioned below under 'Authorities,' describes an account of the Bengali Alphabet older than that of Chamberlayne. He says:—

'It was published with a Burmese alphabet in 1692 in a work containing observations by the Jesuit Fathers Jean de Fontenay, Guy Tachard, Etienne Noël and Claude Bèze. The title of the book is *Observations Physiques et Mathématiques pour servir à l'histoire naturelle, et à la perfection de l'Astronomie et de la Géographie; Envoyées des*

Indes et de la Chine à l'Académie Royale des Sciences à Paris, par les Pères Jésuites. Avec les reflexions de Mrs. de l'Académie, et les Notes du P. Gouye, de la Compagnie de Jésus. A Paris, de l'Imprimerie Royale, M. DC. XCII; 4°, pp. 113, 2 maps, and 1 plate containing the characters of the people of Bengala and Baramas [Burma]. To this Father Hosten adds the following note:—‘*Cf. Sommervogel, Bibl. de la C. de Jésus, III, Col. 1641, No. 2.*—I take the remark about the alphabets from a description in a bookseller’s catalogue. The authors of the book were members of a scientific mission sent by Louis XIV to Siam. *Cf. Missions Belges, Nov. 1913, pp. 405-406.*’

Page 23, line 6 from below of text.—Kehr’s *Aurank Szeh* is in the British Museum Library (Press-mark, 602. h. 19). I am indebted to Dr. Barnett for the following information concerning it:—Its title is as follows:—

“MONARCHAE MOGOLO-INDICI, vel MOGOLIS MAGNI AURENK SZEB NUMISMA INDO-PERSICUM argenteum quinquelibræ rarissimum in solennem renovationem et confirmationem clientelarum urbis ac sedis imperatoriae DELHI, nunc dictæ DSCHIHANABAD, signatum . . . latine recensitum, explicatum, examinatum, et contra dubia quorundam, imprimis contra Moslemanum illum celeberrimum, illustrem atque doctissimum, SCHEICH MOHAMMED EFENDI, Reipubl. Africo-Tripolitanae Cancellarium, et ad Aulam Caesaream Viennensem nuper Legatum, perspicue, solide ac modeste vindicatum, et variis notis . . . illustratum a M. Georgio Jacobo Kehr, Silusia-Franco Orientali. In Appendice, Indo-Maurorum characteres Arithmetici, alphabetum Bengalicum, & syllabarii Mongalo-Kalmuckici pars exhibetur. Lipsiae, impressit Heinrich Christoph Takke, 1725.” The appendix to which this refers is a plate containing the arithmetical symbols used by the Moslems (not the usual numbers, but the alphabetical symbols), part of a Mongol alphabet and syllabary, and a Bengali alphabet with a “specimen lectionis Bengalicae” consisting of the words “Sergeant Wolfgang Meyer” written in Bengali script. The alphabet is very fairly written. It transliterates the sounds thus: Koo Gkoo Goo Gho Ona; Sjo [Scho] Sjoo [Schoo] Joo Sjoo [Schoo] Eio; Too Tho Doo Dho Anno; To Tho Do Dho Noe (Nu); Po Pho Boo Bho Moe (Mu); Joo Roo Loo Bo Soo Soo Soo Loo [sic.] Khieo. He also gives a woodcut of Bengali numerals on p. 43, and some specimens of Javanese on pp. 46 and 47. The book contains 6 and 51 pages quarto, with 2 plates.’

Page 42.—Second paragraph of the Note at the head of the specimen. I find that my statement that, in the phonetic transcription, the sound of *sh* in *shell* is represented by *sh* has been widely misunderstood. Many readers have assumed that by this statement I implied that, in the phonetic transcription *sh* represented the sound of the Bengali ষ, which, in transliteration, is represented by *sh*. Nothing was further from my intention. The phonetic transcription is entirely independent of any system of transliteration, and aims at representing English sounds by English letters. In the phonetic transcription, *sh* represents the English sound of the English letters in the English word *shell*, and nothing more. The sound represented by it corresponds most nearly to that of the Bengali ষ, which, in transliteration, is represented by *ś*. It has nothing whatever to do with the sound of the Bengali cerebral ষ. The same remarks apply to the spelling in other phonetic transcriptions (pp. 168, 175, 178, 207, 235, 251, 254, 262, 267, 273, 276, 296, 303, 307, 310, 314, 318), and, especially, to that in the column for Bengali Colloquial (Phonetic Transcription) on pp. 352ff.

Page 70, line 3.—For '12,801', read '27,908'. Make the same alteration in the last line of the Table on the same page, and alter the Total '3,952,534' to '3,967,641'.

Page 99, line 14.—For '12,801', read '27,908'.

VOLUME V—PART II.

Page 18, line 11.—I find that Father Antonio's translation was not into Chhikā-chhikī Bōlī, but was into ordinary Western Hindī. For further particulars, see the Addenda Minora to page 96.

Page 19, Heading IV.—GENERAL LITERATURE. Add the following works dealing with Vidyāpati :—

NAGENDRA NATH GUPTA.—*Vidyāpati Thākur*. *Journal of the Asiatic Society of Bengal*, Vol. lxxiii, 1904, Part I, Extra Number, pp. 20ff.

" " —*Vidyāpati Thākurer Padāvalī*.—No. 24 of the series entitled the *Baṅgīya-sāhitya-parishad Granthāvalī*. Calcutta B. S. 1316 (=1909 A. D.). This is a very complete edition of Vidyāpati's songs, in the Bengali character, and with a full Introduction in the Bengali language. An edition in the Nāgarī character was published at Allahabad by the Indian Press in 1910.

GRIERSON, G. A.—*Vidyāpati Thākur*. *Journal of the Asiatic Society of Bengal*, New Series, Vol. I, p. 228. Remarks on Nagendra Nath Gupta's article in Vol. lxxiii, mentioned above.

Page 25, line 11 from below.—For 'this cart,' read 'his cart'.

Page 26, Pronouns.—The honorific oblique singular of *ī*, this, is *hinī*, and of *ō*, that, is *hunī*.

Page 41, line 15.—Since this was written, I have ascertained that the language of the western part of Mirzapur, including the Sadr Tahsil, and a part of Chunar Tahsil, is not Bhojpurī, but is the Awadhī dialect of Eastern Hindī. See Addenda Minora to Vol. VI, p. 1. The number of speakers of Awadhī in this tract is roughly estimated at about 350,000, and this amount should be deducted from the number of speakers of Bhojpurī in this volume.

Page 44.—In the table on this page, as explained in the Addenda to p. 41, alter the figures for Western Dialect from 3,939,500 to 3,589,500, and alter the Total from 16,776,937 to 16,426,937.

Page 47.—The following example of the use of the word 'Bhojpurī' may be added to those of 'Poorbeea' on this page :—

1789. Two days after, as a regiment of Sepoys on its way to Chunar-ghur, was marching through the City at daybreak, I went out, and was standing to see it pass by, the Regiment halted; and a few men from the centre ran into a dark lane, and laid hold of a hen and some roots: the people screamed. "Do not make so much noise," said one of the men in his Bodjpooria Idiom; "we go to-day with the Frenghees, but we are all servants (tenants) to Chāyt-Sing, and may come back to-morrow with him; and then the question will be not about your roots, but about your wives and daughters." *Raymond*, Translation of the *Sēr Mutaqherin*, 2nd Ed., Translator's Preface, p. 8.

Page 96, line 8.—Up to the time of writing this passage, I had failed in identifying the Father Antonio here referred to. Since then, Father H. Hosten, S. J. has very kindly communicated to me the following particulars :—He was Father Antonio Pezzoni, a Capuchin, who came to India in 1806. His translation was not into the Ohhikā-chhikī dialect of Maithilī, but into ordinary Western Hindi, written in the Nāgarī character. It consisted of the Pentateuch, the Psalms, the Gospels, the Acts and the Epistles. He also wrote many works of Catholic devotion, and was engaged on a Latin-Hindōstānī dictionary when he died at Lugano in 1844. According to Dr. Long in the *Calcutta Review*¹, the Rev. Dr. John, who wrote in 1809, mentioned the translations of the Gospels and the Acts, so that they must have been made within three years of Father Antonio's landing in India. He lived for many years in Bettiah, in the north of the Champaran District of Bihar, and there does not appear to be any record of his having made any lengthy stay in Bhagalpur. A copy of his Gospels and Acts (made in 1837) is still in Bettiah. Another copy is to be found in the Convent of the Native Nuns of Agra, and is dated 1844. Father Felix O. C., in a letter to 'The Examiner' (Bombay) published in the issue of December 13, 1913 (p. 495), states that he found a copy of the whole work in the Jesus and Mary Convent at Lahore, and that he had presented it to the Provincial of the Capuchins of the Swiss Province, Lucerne, where, at the time of his writing, it was kept. He had, moreover, in his own possession a copy of the manuscript of the New Testament only. Father Felix, in this letter, gives as a sample Father Antonio's version of the Magnificat. For further information, *see* also a letter from Father H. Hosten S. J. on pp. 435ff. of the 'Examiner' of November 1, 1913.

ORİYĀ.

Pages 367ff.—I am indebted for the following corrected information regarding Orīyā to the kindness of Babu Monmohan Chakravarti, a gentleman who served as Deputy Magistrate and Deputy Collector for several years in Orissa and in the adjoining District of Midnapore.

Page 367, lines 10ff of text from below.—The number of speakers of Orīyā in Binpur Thana of Midnapore is small. On the other hand there are many speakers of the language in Thana Narayangarh of that District. In the map facing p. 106 of Vol. V, Pt. I, the main language of the latter Thana is shown as South-Western Bengali. While this is correct, it must be understood that many speakers of Orīyā are to be found in the same tract.

Page 368, line 2.—I have fixed the point at which the southern limit of Orīyā touches the sea as near Barwa. This is so shown in the map facing page 367. Babu Monmohan Chakravarti is of opinion that it does not extend farther south than the station of Ichchapuram on the East Coast section of the Bengal-Nagpur Railway. Ichchapuram is marked 'Echapur' in the map facing page 367, and this would move the southern boundary of Orīyā about fifty miles to the north. My own statements on page 368 were based on reports received from Ganjam, and it is probable that between Barwa and Ichchapuram there is a debatable tract, in which both languages are spoken.

Page 369, line 20.—Regarding the Orīyā spoken in Cuttack Town, Babu Monmohan Chakravarti informs me that it has not been affected by Bengalisms. On the contrary, the speech of the Bengali settlers has been much changed by the surrounding Orīyā. The speech of the lower classes of the town has to some extent been affected by the bastard Urdū of the local Musalmāns, who represent settlers from up-country.

Page 369, line 30.—Babu Monmohan Chakravarti has given me the following additional notes on the Midnapore pronunciation:—‘I think the speech of Contai Thana is in its skeleton Oṛiyā, but is otherwise so modified by the adjoining Bengali, as to be called a Bengalized dialect of Oṛiyā. The speech in Narayangarh and in Dantan Thanas closely approaches the dialect of North Balasore. In Thanas Gopiballabhpur and Jhargaon the pronunciation and apparently some of the grammatical terminations and words approach the hill dialect prevalent in Mayurbhanj and Keunjhar Tributary States.’ Regarding the Oṛiyā of the south, he says, ‘The Oṛiyā speech of Berhampore [in Ganjam] and downwards looks also like a separate dialect, differing to some extent from the Standard’.

McPHERSON, SIR HUGH, K.C.I.E., C.S.I.—*The Oṛiyā Alphabet. Journal of the Bihar and Orissa Research Society*, Vol. X (1924), pp. 168ff. Contains a full account of the Alphabet, with specimens of all conjunct consonants.

Page 378.—Section on pronunciation. Babu Monmohan Chakravarti gives me the following additional information:—In ordinary talk no distinction is made between long and short *i* and *ī*, or between *u* and *ū*.

Page 379, line 17.—The statement about the southern pronunciation of ॐ and ॐ is incorrect. When between vowels in the same word, these letters are everywhere pronounced as *ra* and *rha* not as *da* and *dha*, respectively. The omission of a dot under them is purely a matter of writing, and does not indicate any variation of pronunciation. All that can be said about the southern pronunciation of these letters is that the further south we go, the stronger is the cerebralization. So also as regards the letter ॐ *la*.

Page 380.—**Pronouns.** In the colloquial language, *āmmāne* is commonly used for *āmbhē-mānē*, and *tumē* for *tumbhē-mānē*.

Page 383.—It should be noted that the specimen from Cuttack on this page is from the pen of Babu Monmohan Chakravarti, and is hence of special value.

Page 398, line 22.—Regarding the pronunciation of the cerebral ॐ *ra* in Puri, see the remarks on page 379. So also in regard to what is said about this letter in line 32, lower down. The Puri spelling *pardila* is merely an attempt to represent the sound of *parila* in a new way.

Page 425.—Babu Monmohan Chakravarti informs me that this specimen from Dantan Thana of Midnapore is here and there Sanskritized, and is not in all places colloquial.

Page 441.—In the Addenda Majora will be found a Standard List of Words and Sentences in Oṛiyā which has been prepared by Babu Monmohan Chakravarti. It is more correct and is in a more colloquial style than that given on pp. 441ff.

VOLUME VI.

Page 1, line 10.—I have here confined the Eastern Hindī of Mirzapur to the South-Sone tract of that District. Subsequent inquiries, for the results of which I am indebted to the kindness of Mr. R. Burn, C.S.I., have shown that the Awadhī dialect is also spoken in the western portion of the North-Sone tract between the Sone and the Ganges,—say in the Sadr and the western part of the Chunar Tahsils. The map facing the frontispiece should be altered accordingly. This will also entail an addition of about 350,000 people to the number of speakers of Eastern Hindī, and a corresponding reduction to the number of speakers of the Western Bhojpurī dialect of Bihārī as given on page 44 of Volume V, Part ii. See also the Report of the 1901 Census of the N.-W. Provinces and Oudh, p. 177.

Page 2, line 3.—*Add*,—as explained in the Erratum to p. 1,—350,000 to the number of speakers of Awadhī, and increase the total accordingly.

Page 9, line 9.—As explained in the Erratum to p. 1, Awadhī is spoken not only in South-Gangetic Allahabad, but also in the western Tahsils of Mirzapur.

Page 10.—In the Table, after the figures for North Mirzapur, *add* ‘Central Mirzapur, 350,000.’ These figures are a very rough estimate of the number of speakers of Awadhī in the Sadr and Chunar Tahsils of Mirzapur, as explained in the correction to page 1. The total of this Table should also be correspondingly increased, and in line 9 of the text from below, 16,000,000 should be altered to 16,350,000.

Page 12.—As explained in the Erratum to p. 10, the second Table on this page should run as follows:—

Total number of people speaking Awadhī at home, say .	16,350,000
Estimated number of people speaking Awadhī elsewhere in	
Bihar and Bengal	111,258
Estimated number of people speaking Awadhī in Assam .	32,290
TOTAL .	<u>16,493,548</u>

BABURAM SAKSENA, M.A.—*Lakhimpurī—A Dialect of Modern Awadhī. Journal and Proceedings, Asiatic Society of Bengal (New Series), Vol. xviii (1922), pp. 305ff.* Lakhimpur is the name of a town in about the centre of the District of Kheri. Mr. Saksena states (p. 308) that the specimen of the dialect of Sitapur given on p. 91 of the Survey is in the dialect of the west of that District. The dialect of the town of Sitapur, which is centrally situated, differs slightly.

Page 116.—As explained in the corrections to pp. 1 and 10, the language of the western half of the Central portion of Mirzapur is Awadhī, not, as here stated, Bhojpurī. Hence, in the table, on this page, correct :—

'Western Bhojpurī	810,000', to :—
'Western Bhojpurī	460,000
Awadhī of West of Central Tract	350,000'

The total for the whole District, of course, remains unaltered.

Page 7. *Last paragraph.*—In this passage, I have followed Dr. Trumpp in describing these peculiar Sindhī sonants as doubled letters. Since I wrote the passage, they have been analysed in the phonetic department of the London School of Oriental Studies, and the result has been published by Dr. Grahame Bailey on page 835 of Volume II of the *Bulletin* of that institution. It appears that, whatever Prakrit sounds they are derived from, in Sindhī they are not doubled letters at all. They are what Dr. Bailey calls 'implosives', *i. e.*, they are uttered, not with an expiration, as ordinary consonants or 'plosives', but with an intake of breath. In pronouncing these sounds, the breath is drawn into the mouth, but is not allowed to reach the lungs, the air not being permitted to go beyond the larynx. They have been further discussed by Professor R. L. Turner in Vol. III of the *Bulletin*, pp. 301 ff., where their origin and use are very fully dealt with. Professor Turner calls them 'recursives', which seems to be the best name.

In pp. 110ff. of the same work, there is also a short account of Bahramgala, spoken in a village of that name south of the Pir Panjāl Pass. It closely resembles Dhūṇḍī, see pp. 495ff. *ante*.

VOLUME VIII—PART II.

Page 2, line 22.—Since this was written, through the kindness of Sir Aurel Stein, I have become possessed of a specimen of Tirāhī, and an account of that language will be found in pp. 265ff of the *Addenda Majora*.

Pages 7 and 8.—As explained on p. 100 of the General Introduction, I now follow Professor Giles in considering that the Aryans first entered Persia, whence they sent offshoots into India, and into the Hindūkush. The speech of those who went into India became the parent of the Indo-Aryan languages, and owing to its isolated position was more conservative, its rate of development being slower than that of the parent language left behind in Persia. The oldest example of it that we possess,—the Vedic Sanskrit,—is much more archaic in its character, and much more nearly resembles the parent Aryan language spoken in Eran before the migration, than the surviving specimens of Eranian. If, therefore we take Vedic Sanskrit as most nearly representing the original Aryan language the graphic representation on page 7 would have to be altered as follows :—

The Dardic languages, in this case, would be the descendants of the speech of other waves of emigrants, who broke off from the Eranian stock some time after the Indo-Aryan emigration, and who wandered off in the direction of the Hindūkush, whence they descended into the Dard country. Later waves of this last emigration, when the characteristics of the Eranian languages had nearly fully developed, settled in the Hindūkush itself, and their speech ultimately became the Eranian Ghalchah languages, while, in the case of the ancestors of the Dards, these characteristics had only partially developed, so that we find the Dardic languages at the present day retaining much of the characteristics of the original Aryan language, as we know them from Vedic Sanskrit, but also marked by certain of the earlier changes which marked the development of the Eranian forms of speech. This would be represented graphically by the following diagram, which would supersede that given on page 8 :—

Whichever way we look at the matter, the result is the same in both cases. The Dardic languages are partly Eranian and partly Indo-Aryan.

Page 68, line 4.—Since this was written, Dr. Morgenstierne, during a visit to Kabul, has succeeded in obtaining specimens of Ashkund. He tells me that, while in some respects resembling Bashgalī, it is on the whole most nearly related to Wai-alā. A Specimen and List of Words will be found on pp. 248ff. of the Addenda Majora.

Page 69, line 5.—To the list of languages of the Kalāshā-Pashai sub-group, should now be added a fourth,—Tirāhī. Regarding which particulars are given in pp. 265ff. of the Addenda Majora.

Page 110 (following the Pashai Specimens). On page 2, line 22, I stated that no specimens could be obtained of the Tirāhī language. All that had hitherto been known about it had been contained in a short list of words published by Leech in the year 1838¹. This was sufficient to show that it belonged to the Kalāshā-Pashai Sub-Group. Further information has since been obtained, and this is given in pp. 265ff. of the Addenda Majora. See also Sir Aurel Stein and the present writer in J. R. A. S. 1925, pp. 399ff. and 405ff.

Page 150.—Since this account of Shīnā was written, the language has been thoroughly investigated on the spot by Colonel D. L. R. Lorimer, C.I.E. Owing to his kindness, I am able to make the following additions to the general remarks on page 150.

Line 8.—Add ‘The Gilgit dialect has also, of late years, become much contaminated by one form or another of Hindōstānī owing to the presence and activities of the Imperial Service Troops (Gurkhās, Dōgrās, and Panjābī Muhammadans) and of Government officials.’

Last line of text.—The North-Western dialect is spoken in Punial (properly ‘Pūyā’), the district adjoining Gilgit on the West and North-West. This dialect shows divergencies both of pronunciation and of vocabulary from that of Gilgit, and still awaits study.

¹ Journal of the Asiatic Society of Bengal, Vol. vii (1838), pp. 782ff.

*Footnote*¹, *line* 2.—Colonel Lorimer informs me that the correct name of the language is 'Shinā', with the cerebral letter *sh* for its initial. In other respects his information is the same as that given to me by Dr. Grahame Bailey.

*Footnote*².—Colonel Lorimer informs me that the only local form of the name 'Gilgit' is 'Gilit', which is reduced to 'Gilt-' in the oblique cases, as in *Giltēi*, of Gilgit, but *Gilitēi*, a man of Gilgit.

Page 151.—The account of Gilgitī given in pp. 328ff. of the Addenda Majora should be substituted for that on pp. 151ff. It is based on materials and criticisms most kindly given to me by Colonel Lorimer.

Pages 174ff.—GURĒZĪ. In this section, the letters *á* and *é* correspond, respectively, to the *à* and *è* employed in the account of Gilgitī Shinā given in the Addenda Majora. A brief account of this dialect will be found in Dr. Grahame Bailey's *Shina Grammar* mentioned in the Addenda Majora to p. 151.

Pages 186ff.—(BRŌKPĀ OF DRAS) and pp. 208ff. (BRŌKPĀ OF DĀH-HANŪ). In these sections, the letters *tsh* and *zh* evidently correspond, respectively, to the cerebral *ch* and *j* of Gilgitī Shinā, as described in the Addenda Majora. The sounds, as described, are either the same, or else very similar. A brief account of the Dras dialect will be found in Dr. Grahame Bailey's *Shina Grammar* mentioned in the Addenda Majora to p. 151.

Page 230, No. 180, Brōkpā (Dras) column.—For '*kūtē*', read '*kutē*'.

*Footnote*¹, *line* 2.—Colonel Lorimer informs me that the correct name of the language is ‘*Ṣhīṇā*’, with the cerebral letter *ṣh* for its initial. In other respects his information is the same as that given to me by Dr. Grahame Bailey.

*Footnote*².—Colonel Lorimer informs me that the only local form of the name ‘Gilgit’ is ‘Gilit’, which is reduced to ‘Gilt-’ in the oblique cases, as in *Giltēi*, of Gilgit, but *Gilitēi*, a man of Gilgit.

Page 151.—The account of Gilgitī given in pp. 328ff. of the *Addenda Majora* should be substituted for that on pp. 151ff. It is based on materials and criticisms most kindly given to me by Colonel Lorimer.

Page 559.—Colonel Lorimer informs me that there seem to be considerable variations in forms and in vocabulary between the Burushaski of Hunza and that of Nagar. By all accounts, the Yasin dialect, *i.e.*, Warshikwār,—or, more correctly, Warchikwār,—dialect is still more different. In this word 'Warsh' or 'Warch' is apparently the same as 'Burush', and *-ik* is the Khōwār suffix *-īk*, which indicates a place or person, as in 'Twik', a man of Tūi. Finally *wār* is the Khōwār for 'language'. 'Warshigūm' or 'Wershagūm' is the name for Yasin.

It is quite correct to say that Sarshār and Sharar were opposed to the artificial thought and diction of the old Lucknow school, but it should have been explained that they did not belong to Delhi, but themselves lived and worked in Lucknow, and that they were reformers, rather than opponents, of the pedantic style referred to in this passage.

Add at the end of the List of Authorities on Mārṇwārī:—

TESSITORI, Dr. L. P.—*Notes on the Grammar of the Old Western Rājasthānī with special reference to Apabhraṃśa and to Gujarātī and Mārṇwārī.* This appeared in the Indian Antiquary. Volumes xliii, xliv, and xlv (1914, 1915, and 1916). A separate reprint appeared in Bombay in 1916. In this important work, the late Dr. Tessitori showed that down to the fifteenth century, A. D., one and the same language was spoken over western Rajputana and Gujarat. From it both modern Mārṇwārī and modern Gujarātī are descended. Reference may also be made to the same author's *The Origin of the Dative and Genitive Postpositions in Gujarātī and Mārṇwārī* in pages 551ff. of the *Journal of the Royal Asiatic Society* for 1913.

Page 757, line 5.—Add, 'On pp. 201ff. of his *Linguistic Studies from the Himalayas* (Asiatic Society Monographs, Vol. XVII, London, 1920), Dr. Grahame Bailey gives a fuller account of Sukēti. He distinguishes three sub-dialects. In the west of the State the language is pure Maṇḍēālī. Towards the East it becomes Eastern Sukēti, and in the extreme East we have Sukēti Sirājī, which corresponds to the Maṇḍēālī Pahārī of the State of Mandi.'

VOLUME X.

Page 43.—Dr. Morgenstierne informs me that the Ghilzai dialects form a connecting link between the Pakhtō of the North-East, and Paṣhtō of the South-West. The language of the southern clans approaches the latter, and that of the others the former.

Pages 70ff.—Dr. Morgenstierne informs me that the specimen on these pages is not in the pure Bannu dialect, but has been 'made elegant' by the original Afghan translator, who added an infusion of the Peshawar dialect.

Page 123, line 4.—According to information supplied to me by the late Mr. Dames, the name of the language is 'Bargastā' or 'Barg^astā'. Ghulām Muḥammad Khān throughout spells it برکستا, *i.e.*, 'Bargistā', with *kasra* in the second syllable. But he sometimes elsewhere employs *kasra* to indicate the *fatha-ë-Afghānī*, so that perhaps he meant his spelling to indicate 'Barg^astā'. Mr. Dames told me that he had never heard the word pronounced 'Bargistā', and as he had, when in India, actually discussed the language with Ghulām Muḥammad Khān, his opinion is of great weight.

Page 3.—Add at end:—

‘ Since the above was written, Dr. Grahame Bailey has published on p. 265 of his *Linguistic Studies from the Himalayas* (Asiatic Society Monographs, Vol. XVII, London, 1920) an account of the argot employed by the Qalandars, a nomadic tribe the members of which make their living by conjuring and by showing performing bears, monkeys, and goats. In the general principles of its formation, this argot closely resembles the others described in this volume.’

Page 8.—At the end of the second complete paragraph on this page, after the words ‘ his hearer could understand ’, add the following:—

‘ Mutations and transpositions play a considerable part in the Śaiva Āgamas, where they are used with the object of making certain texts unintelligible to those who are not initiated. The *mlēchchhitaka-vikalpāḥ*, i.e., the different kinds of *mlēchchhitaka*, or transpositions or mutations of letters so as to make one’s speech unintelligible, form one of the sixty-four *kalās*, or arts with which an Indian gentleman or lady should be acquainted. A list of these arts,—which already appears in Vātsyāyana’s *Kāma-sūtra* (pp. 32ff. in the Nirṇaya Sāgara edition, Bombay, 1891),—is given in Śrīdhara’s commentary to the *Bhāgavata Purāṇa* (X, xlv, 36), and is there stated to have been taken from the *Śaiva-tantra*. Its inclusion in the *Kāma-sūtra* is in accordance with the tradition that that work was revealed to mankind by Nandin, the attendant of Śiva. In his commentary to the *Kāma-sūtra*, Yaśōdhara gives the names of some of these argots,—such as “ Kautāliya ”, “ Mūladēviya ”, and so on,—and quotes verses from other writers in explanation of their peculiarities.’

Page 71, line 8.—Add after ‘ Gipsy tribe ’. ‘ Mr. Sedgwick informs me that the caste usually calls itself “ Dōmhār ” when it goes in for acrobatic work, and “ Kōlhāṭī ” when it follows other callings ’.

Page 89.—The meaning ‘ scabbard-maker ’ attributed to *Myānwālē* is doubtful. In a private letter Mr. Sedgwick suggests that these people may have originally come from Sind. In that Province the Kalhōra chiefs are known as ‘ Miān ’, and their followers are known as ‘ Miānwāls ’. The Kalhōras are believed to have been originally disciples of a Kurdish *Murshid*. In Sind, ‘ Lōhār ’ is generally pronounced short as ‘ Lhār ’.
